Contact LaFace & McGovern for your Lighting & Control Needs

Integrating these UV products into your normal cleaning routine will help destroy and prevent bacteria and viruses. These products are not meant to replace traditional methods of cleaning and sanitizing air, surfaces, and personal items.

AIR SANITIZING + LIGHT, NOW THAT'S SMART

cleanse® is a suite of solutions created to sanitize air and surfaces to help keep people and their environments healthy. By employing ultraviolet (UV) technology, the cleanse® sanitation process modifies and destroys the genetic material (DNA/RNA) of bacteria and viruses preventing further replication.

DOING OUR PART TO KEEP WORKERS SAFE

Barbican Guard Series health and lifestyle focused products have stringent standards to both finish and construction as it applies to antimicrobial surfaces, washable surfaces, and dust/dirt infiltration. Create a healthy workspace by adding a protective shield to your work area. The modern, non-intrusive design will blend into any space.

DISINFECTION ON DEMAND ANY ROOM, ANY SIZE, ANY TIME

PURO™ UV Disinfection Lighting products, powered by Violet Defense™ technology, use powerful broad-spectrum UV that has been clinically tested to eliminate up to 99.9% of pathogens. PURO Lighting units have a special "motion detection" technology to ensure that unit operation stops when people or animals are present.

KEEP YOUR COMMUNITY SAFE

Rosco Gobos for Health projections are a professional solution that can be used to promote healthy practices in any establishment. Whether it's gobos asking you to put on masks, wash your hands, or a reminder to maintain social distancing. Projecting a message with a lighting fixture allows for a temporary installation on delicate surfaces and hard to reach places.

LEVERAGING THE POWER OF LIGHT TO PROTECT THE WORLD

Safeology™ UVC disinfecting solutions harnessed the expertise built through decades of experience in LED and Lamp fixture technology. These products use UVC light to help create clean, pathogen-free spaces to give your customers peace of mind. With Safeology, you can safely, quickly and efficiently eliminate up to 99.9% of surface and pathogens, helping you to create clean, worry-free environment.

STAY SAFE WITH PPE & UV-C

Zooling will connect you or your business to the personal protective equipment and UV-C products you need to keep yourself safe and your business compliant. Zooling Personal Protection Equipment is safe and effective to sterilize all your personal and commercial items. Enjoy a healthier life with less germs around.

CONTROLLING YOUR ENVIRONMENT

Create a Hands-free, Hassle-free Touchless Smart Automation System with Control options that can be programmed to allow for UVC lighting to be on a time schedule for sanitizing and disinfection.
